Technical Section

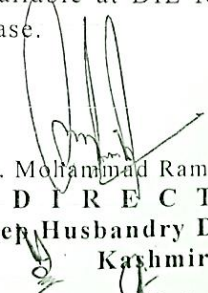

Subject: "Disposal of brucella affected animals".

C I R C U L A R

There has been an increase in the incidence of brucellosis in some districts especially in Govt. Rams during the past few months. Though the department is committed to strictly follow the protocol devised by the departmental experts which is based on the WHO recommendations for immediate disposal of brucella affected animals in order to prevent the spread of the disease. However, the disposal of brucella suspected **valuable govt. animal** necessitates due authentication of identity of affected animal, its clinical features/history and confirmation of the disease in order to safeguard the precious livestock from unnecessary disposal.

Accordingly, it is impressed upon all farm and field officers to get the identity of the affected animals certified from the Deputy Director Research, Disease Investigation Laboratory, Nowshera before submitting cases for their disposal to this office. They shall also furnish the clinical features/history of each animal proposed to be disposed off for said reason.

The DDR shall ensure that the teams deputed for said purpose shall duly verify the identification of suspected animals before collecting the clinical samples for laboratory confirmation of the disease. The DDR shall also provide the results of all the diagnostic tests available at DIL for brucellosis and shall furnish his recommendations for each case.

Dr. Moltammad Ramzan Shiekh
